

# SERVICE INTERCOM

WIRED INTERCOM system

Peltor's Service Intercom is the simplest way to set up a portable or fixed intercom system for extreme noise environments. In these harsh noise conditions, wired intercom systems are often the only method of communication – particularly when the people communicating are relatively stationary and don't need to move around. Peltor Service Intercom is so versatile it can meet the needs of most applications, while offering several advantages over radio communication.

- ▶ **Up to 25 users can be connected at once**
- ▶ **Fixed or mobile installation**
- ▶ **Simple and inexpensive to install**

# SERVICE INTERCOM

## WIRED INTERCOM SYSTEM

### HARDWIRED SYSTEM

Intercom wiring runs through the Connector Box at designated work stations. One or more headsets may be used at each of these stations.

### PORTABLE SYSTEM

Extension and split cables allow you to set up a portable system that meets your needs. From 2 to 25 users can be connected.

Neckband model

Hardhat mount model

3 band models available

Heavy duty carrying bag available

Patented stainless steel spring arms designed for durability and low pressure

Uses one 9-volt battery
